DIVVELA HEMANTH KUMAR

Software Developer

+91-8897754668 | hemanthkumardivvela@gmail.com | LinkedIn | GitHub | portfolio.com

CAREER OBJECTIVE

B.Tech graduate with skills in Python, JavaScript, React.js, SQL and Full Stack Development. Passionate about developing scalable web applications and solving real-world problems. Seeking an entry-level Software Developer role to apply technical and analytical skills.

EDUCATION

Bapatla Engineering College **2021–2025**
Bachelor of Technology in Information Technology, **CGPA: 6.8** Bapatla, AP

Narayana Junior College **2019–2021**
Board of Intermediate, **Percentage: 83** Chirala, AP

Bhashyam High School **2018–2019**
SSC, **CGPA: 8.7** Chirala, AP

SKILLS

Programming Languages: Python, SQL
Frontend: HTML5, CSS, BootStrap, JavaScript, React.js
Backend & APIs: Flask, REST APIs, API Integration, CRUD Operations
Database: DBMS, MongoDB
Libraries & AI: Pandas, NumPy, Generative AI Fundamentals
Core Concepts: Data Structures, Algorithms, OOP, SDLC
Tools: Git, GitHub, VS Code
Soft Skills: Problem Solving, Analytical Thinking, Communication, Time Management

INTERNSHIP

Coding Rajas Technologies **May 2024 – July 2024**
Data Science Intern Virtual

- Built Python-based solutions for data processing and analysis using Pandas and NumPy.
- Performed data preprocessing, cleaning, and validation on structured datasets.
- Debugged Python programs and verified expected outputs to improve accuracy and reliability.
- Interpreted results and documented findings to support data-driven decisions.

PROJECTS

Employee Management System Live Demo **July 2026 – August 2026**
Python | Flask | HTML | CSS | JavaScript | MongoDB

- Built a web-based Employee Management System using Python and Flask.
- Implemented CRUD operations, REST APIs, authentication, and database integration for employee data management.
- Managed employee records through database operations for storing, retrieving, updating, and maintaining data, along with testing and validation.
- Generated Excel and PDF reports and performed debugging to ensure accurate and reliable system functionality.

AI-Integrated Online Assessment Platform Live Demo **January 2025 – March 2025**
React.js | JavaScript | Node.js | MongoDB | Python

- Developed a full-stack web application using React.js, JavaScript, Node.js, Express.js, Python, and MongoDB.
- Built REST APIs to connect user interfaces with server-side services, implementing authentication, authorization, CRUD operations, and input validation.
- Created reusable components and established communication between frontend, backend, and database layers.
- Conducted functional testing, debugging, and data validation to identify issues and enhance system reliability.

CERTIFICATIONS

Deloitte – Data Analytics Job Simulation Certificate **March 30, 2026**
TCS – GenAI Powered Data Analytics Job Simulation Certificate **March 30, 2026**
Data Science Internship – Coding Rajas Technologies Certificate **May 2024 – July 2024**
